**Stock Christiane: Wie bedeutsam ist Gesundheit für den Studienerfolg von Studierenden? In: Prävention und Gesundheitsförderung (2017), H. 4, S. 230 - 233**

Journal title

## Solution A – Articles & More (OPAC)

The screenshot shows the OPAC search interface. At the top, there are several search criteria fields: Author, and, Basic search, and, Title, and, Subject, and, Year, and. The Title field contains the text "wie bedeutsam ist gesundheit für den studien Erfolg". A blue callout box points to this field with the text "Search for the article title". Below the search criteria fields are "Clear" and "Search" buttons. Under the "Limit search" section, there are radio buttons for "Exact words" (selected) and "Find similar terms". Below this are dropdown menus for "Current branch" (THB Deggendorf), "Search in branch" (all), and "Language" (all). There are also fields for "Type of medium" (all), "Year from", and "Year to". Below the "Search preferences" section is the "Database selection" section. It has two columns: "Databases" and "Database selections lists". In the "Databases" column, there are checkboxes for "all" (selected), "none", "Deggendorf Institute of Technology Library", "Bavarian Library Network", "Articles & More" (selected), "Bibliotheksverbund Nieuw", "Union Catalogue South-Western", "Union catalogue Hestia", and "Union catalogue". A green circle highlights the "Articles & More" checkbox. A blue callout box points to this checkbox with the text "You only can search for **article titles** with Articles & More (default setting) in the OPAC". In the "Database selections lists" column, there is a section for "SunRise databases" with a "Standard database selection" and a "Select" button.
